Native Wildflower Sites Survey

The purpose of this project is to document routes where motorists, cyclists, and hikers can view showy stands of native wildflowers and grasses, as well as stands of herbaceous species that may be less showy, but are good examples of habitats or native herbaceous species found in Lake County. This initial survey and reporting effort will be used to support a formal program for the establishment and management of native wildflower sites within Lake County.

A. Surveys

1. Surveys shall be conducted in Lake County, Florida, in spring, summer, and fall, to locate naturally-occurring stands of native herbaceous species for the intent of developing wildflower routes highlighted primarily by showy* stands, and secondarily by slightly less showy naturally-occurring stands but stands that are representative of habitats or native herbaceous species found in Lake County (*showy is readily visible to the general driving public at the prevailing (posted) speed limit). The base survey effort shall include the work specified in a and b below. The County retains the option to also require completion of the work described in c and d below.

a. All county and state maintained roads, excluding residential and urban areas. The County maintains approximately 1500 miles of roadway. There is general source data to determine the full associated mileage. The contractor shall select start and end points for survey effort.

b. Some Forest Service Roads within the Ocala National Forest to be identified and selected by the contractor.

c. Optional Pricing Item 7 - Paved bike trails (up to 20 miles). Lake County shall provide a “Gator” (utility cart) at each site for each paved trail surveyed.

d. Optional Pricing Item 8 – Six to ten (6-10) County parks and/or public land sites (only areas in the immediate vicinity of parking areas and road frontages, not to exceed two acres per site)

2. Dates of the surveys will be based on the contractor’s knowledge of the flowering phenology data (bloom times) of showy native wildflower and grass species, and anecdotal observations.

a. Performance under Base Pricing Items 1 and 2: Perform one survey in each season, spring, summer, and fall

b. Performance under “a” above with Optional Pricing Item 6 and second use of Base Pricing Item 2: Two surveys in each season, spring, summer, and fall

3. Wildflower routes shall be comprised of loops, and/or backbone roads with one-way spur roads. Loop routes might also include one-way spurs. All routes will include enough wildflower sites proposed by the contractor and accepted by the County to hold the interest of the general public. Routes will not be finalized until all three surveys have been completed. Routes are not intended to cover all showy wildflower sites in Lake County. The information in paragraphs a

through h below shall be documented at each site within each wildflower route identified under Section A of this Statement of Work.

a. Site type – For sites that have an existing showy stand of native wildflower or grass species, or sites that are slightly less showy but are representative of habitats or native herbaceous species found in Lake County

Enhancement – Has (or has the potential to be) substantial, aesthetically-pleasing impact, and if managed appropriately, the existing native wildflower species should be sustainable, and the extent of species will probably expand.

View Only – Sites that are not managed by county or FDOT roadside departments (or contractors), such as those managed by Ocala National Forest.

Do Not Develop – Sites to avoid developing into a native wildflower site because of the proximity of nonnative, invasive species.

b. Season of interest

c. Location (road name, GPS coordinates accurate to 3 meters) and approximate size

d. Habitat

e. Scientific names (genus and species) of existing showy, or potentially showy, native herbaceous species, showy native woody species, and significant numbers of nonshowy native species; on rare occasion, only genus may be listed. Rare, threatened, or endangered species that occur at a site only will be noted in the Table of Species at the end of the report.

f. Management recommendation

g. At least one digital image of site (also see B.6.a)

h. Comments about the site, such as terrain or parking conditions, if applicable.

B. Deliverables

Lake County shall have unlimited, nonexclusive use and ownership of any image included in the survey effort, progress reports, final reports, and other deliverables. Contractor shall not retain any copyright at common law in the images and material produced to Lake County in accordance with the work hereunder.

1. Reports. The format of all reports shall be consistent with the format established by the Florida Wildflower Foundation for wildflower survey reports.

a. Two (2) progress reports (WORD 2003 or later), one each after the spring and summer surveys; shall be delivered via email within 21 calendar days after the final day of the associated survey effort. The progress reports will include information about potential routes and the site information as detailed in A.3.a through h. Each report will be cumulative.

c. The final report shall be delivered via email within two (2) weeks after receipt of all County comments. The final report will be submitted in PDF and Word 2003 formats or later, with image resolution at 200 DPI or greater. This report will include the site-specific information detailed in A.3.a through h for the proposed and accepted routes based on all seasonal surveys

2. ESRI-compliant shape files, with the attribute table to include a species list for each site; to be delivered via email along with the revised version of the final report.

4. Specifications, to include type(s) of seed and general site-specific design, for establishing one new wildflower site at the Lake County Extension Office; site size not to exceed 10,000 sq. ft.; delivered via email by June 30, 2011. The County may, at its option, require the vendor to provide the actual seeds to be planted in the mid-October time frame at this new site. Vendor shall use Optional Pricing Item 11 to establish the price to provide the required seed in the required time frame if the County chooses to exercise this purchase option.

5. A formal training session covering “Management of Roadside Native Wildflower Plantings” shall be provided by the contractor at the Lake County Extension Office during January, 2012. The contractor is to provide a formal presentation addressing concepts and guidelines relevant to such management. The training shall incorporate a visit to the new wildflower site (installed pursuant to 4 above) at the Extension Office to reinforce specific management information. The Extension Office will provide a suitable training room and a LCD projector. Lake County will be responsible for the printing of all handouts.

6. A DVD containing the final report to include, but not be limited to, ESRI-compliant shape files; all training files; high resolution versions (300 dpi or greater) of the images contained in the final report; and specifications for new wildflower site(s). The DVD is to be delivered on date of training. Images are to be in jpeg format.

7. Additional Optional Deliverables:
