## **Addendum Two** **Date: July 18, 2014**

### **RFQ Q2014-00088 / Dump Truck**

The purpose of this addendum is to address questions received to date from Vendors.

**Question 1:** In section 2,item A, a Cummins engine is specified. Is a Detroit Diesel an acceptable alternative?

**Answer 1:** Lake County desires a Cummins engine, as specified.

**Question 2:** Regarding item 3d - pneumatic lift tailgate - Is this what our firm calls a "High Lift Gate"? It raises the tailgate up and out of the way, for larger objects, although ours is hydraulic, rather than air? I am trying to ascertain if the rear gate lifts up and out of the way, or has a normal hinge at top, and flap open from the bottom. The "high lift" type is an expensive option, and I do not want to bid it if it is not required.

**Answer 2:** The tailgate described is the same type tailgate we are seeking. The tailgate should lift up like the high lift option described. Pneumatic vs. hydraulic doesn't really matter to us as long as it functions as it should.

A picture of a dump truck similar to that being requested by this RFQ has been attached to this addendum.
