

Information for Internet Access RFQ
Lake County Library System

Purpose of RFQ	To obtain quotes for Internet Access for the Lake County Library System
Existing Situation	We currently share 100 MG Internet Access with County IT, with the Library System getting 75 MG
Bandwidth Requested	Include Monthly Recurring Costs for 100 MG access and 200 MG access
Additional fees	Also quote any non-recurring charges, including installation charges, etc.
Contract Term	<p>Please quote based on a contract/agreement starting as soon as possible and ending 6/30/2014 if such a term is available.</p> <p>If that term is not available, please quote on your minimum term contract ending on June 30th of the applicable year.</p> <p>Include information on the length of your minimum term agreement.</p>
E-Rate considerations	We will not be applying for E-Rate funding on this initial agreement; however, we will be applying for E-Rate funding for succeeding agreements. That is why we need each agreement to end on June 30 th so that they will be coterminous with the E-Rate Funding year.
Location	Internet Access must be delivered to Room 129, Building A, 315 W. Main St. Tavares, FL. From there it will be delivered to 16 separate sites.
Other considerations	We must be able to filter the internet access through our WebSense server at 315 W. Main St., Tavares, FL
Additional clauses	<p>This agreement must include a Non-Appropriation of funds clause.</p> <p>This agreement must also include a clause allowing us to increase the bandwidth of our Internet Access at any time during any agreement with the amendment for the increase being coterminous with the agreement in place at that time. This is to facilitate applying for E-Rate funding in the future.</p>
IP Addresses	We will need a range of public IP addresses. Please indicate the number of IP addresses that are included with each quote.
