

Extended Supply Network Fact Sheet

Pharmacies that provide up to 90-day supply of medicine

Frequently Asked Questions

What is the Extended Supply Network?

Blue Cross and Blue Shield of Florida's (BCBSF) Extended Supply Network includes more than 2,700 chain pharmacies located throughout the state of Florida. These participating pharmacies are contracted to provide eligible members an extended supply of most commonly prescribed maintenance medications. These services are available to eligible Pharmacy Program members within the state of Florida only.

Am I eligible to receive a 90 day supply at my retail pharmacy?

This benefit is covered under some plans. You should refer to your Policy, Benefit Booklet, Certificate of Coverage or Pharmacy Program Endorsement or call the number on the back of your member ID card for more information.

What is a "maintenance medication"?

Maintenance medications are those drugs that are used to treat chronic conditions, such as hypertension, diabetes, and arthritis. Once it is determined that a medication is safe and effective for your chronic health condition, it is known as a maintenance medication. Please note, not all medications are maintenance, please consult with your doctor or pharmacist to determine which medications would be considered maintenance.

How does my doctor write my prescription?

Once your doctor has determined a medication to be the appropriate maintenance medication for your diagnosed condition, you should ask your doctor to write the prescription for a 90 day supply with any additional refills. For new medications, you should ask your doctor to write 2 prescriptions, one for a 30 day supply and one for a 90 day supply. This will allow you and your doctor enough time to determine if the medication prescribed is safely and effectively treating your diagnosed condition.

What is the difference between ESN and Mail Order Benefits?

ESN and Mail-order both allow eligible members to receive up to a 90 day supply of their maintenance medications. ESN provides the convenience of obtaining your medication at your local participating pharmacy while maintaining the pharmacist-patient relationship. Mail-order provides the convenience of home delivery and mail-order benefits usually provide a reduction in member cost share (please see individual pharmacy endorsement for your specific mail-order benefits).

How do I know if my pharmacy participates in the ESN?

You can visit our website www.bcbsfl.com, select the Find a Doctor or Hospital Quick Link and search for retail pharmacies in your area. Pharmacies participating in the Extended Supply Network should reflect the following in the search results: Network Blue Pharmacy (Up to three-month supply)
